AWS Certified Solutions Architect – Professional

PROFESSIONAL SUMMARY

Strategic **Senior Cloud Architect & Platform Engineering Lead** with 10+ years of experience designing and governing large-scale **multi-cloud environments** across **AWS & Azure**. Proven record in **cloud-native platform design, infrastructure automation** and **CI/CD governance** using Jenkins and Azure DevOps Actions. Adept at aligning technology architecture with business and regulatory requirements in **pharmaceutical and healthcare domains**. Skilled at leading teams, defining cloud standards, and delivering secure, scalable, and cost-efficient solutions.

CORE COMPETENCIES

Multi-Cloud Architecture (AWS, Azure) | Terraform | CloudFormation | CI/CD (Jenkins, Azure DevOps, GIT) | Python | Shell | IAM | VPC | Encryption | HIPAA / GDPR / ISO 27001 | Infrastructure Automation | Serverless & Event-Driven Architecture | Cost Optimization | Platform Governance | Leadership & Mentoring | Agile Delivery | Containerization | Docker | Kubernetes

PROFESSIONAL EXPERIENCE

Senior Cloud Consultant

Novo Nordisk Engineering, Bangalore | *July 2023 – Present*

- Architect and implement **secure cloud-native platforms** across AWS and Azure, supporting healthcare compliance (HIPAA, GDPR).
- Define **infrastructure standards and governance frameworks** to ensure consistency, security, and scalability.
- Lead automation initiatives using **Terraform and Bicep**, reducing manual intervention by 40% with infrastructure automations.
- Collaborate with engineering and security teams to align infrastructure with product and compliance goals.
- Spearhead **cost optimization** and capacity planning for large-scale, multi-region deployments.

Cloud Specialist

Baxter International, Bangalore | *Jul 2019 – Jun 2023*

- Designed and managed **multi-cloud infrastructure** across AWS and Azure, enhancing reliability and compliance.
- Led development of **CI/CD pipelines** with Jenkins and GitHub Actions to streamline infrastructure delivery.
- Implemented Infrastructure as Code (IaC) practices using **Terraform and CloudFormation**.
- Partnered with security teams to implement **VPC segmentation, IAM policies, and data encryption** for regulated workloads.

Professional 1: Application Delivery

DXC Technology, Bangalore | *Jul 2017 – Jun 2019*

- Designed and maintained **AWS-based architectures** with focus on scalability, availability, and compliance.
- Automated environment provisioning and infrastructure updates via **Terraform and Ansible**.
- Supported DevOps enablement through CI/CD integrations and environment standardization.

Associate Analyst

Binary Semantics Limited, Gurgaon | Oct 2014 – Aug 2016

- Supported deployment and customization of **Siebel CRM systems**, focusing on uptime and performance optimization.
- Automated configuration tasks and collaborated with cross-functional teams to improve delivery efficiency.

KEY PROJECTS

1. Multi-Cloud Platform Governance Framework – *NNE Pvt Ltd*

- Designed and implemented a full serverless AI recruitment pipeline integrating AWS Step Functions, Lambda APIs, and DynamoDB for automated resume parsing, candidate scoring, and interview scheduling.
- Improved hiring efficiency and accuracy by automating candidate evaluation workflows with AI-powered resume analysis and calendar-integrated interview invites.
- Designed a unified governance model across AWS and Azure ensuring compliance with **HIPAA**, **GDPR**, and internal standards.
- Automated policy enforcement with IaC, achieving full infrastructure traceability.

2. CI/CD Pipeline Standardization – *Baxter International*

- Co-developed an automated Infrastructure as Code deployment system used by the cloud team to streamline provisioning. Utilized AWS CDKs and Python Boto3 Lambda functions to generate and deploy CloudFormation templates dynamically with event-driven orchestration. Reduced manual provisioning effort and improved deployment reliability through seamless integration of CDK-generated and pre-existing CFTs.
- Built reusable **pipeline templates** in Jenkins and GitHub Actions for environment provisioning and code deployment.
- Improved deployment consistency and reduced release

lead time by 45%.

3. Cloud Cost Optimization Initiative – DXC Technology

- Implemented resource tagging, monitoring, and automated shutdown schedules, reducing overall cloud spend by 20%.

EDUCATION

Bachelor of Technology (Electronics & Communication Engineering) [AIEEE]

Shobhit University, Meerut | *Aug 2010 – Aug 2014*

CERTIFICATIONS

- **AWS Certified Solutions Architect – Professional (Active)**
- **Azure Administrator Associate (Expired – Nov 2024)**

TECHNICAL SKILLS

Cloud: AWS, Azure

IaC: Terraform, Bicep, CloudFormation

CI/CD: Jenkins, Azure DevOps

Languages: Python, PowerShell

Security: IAM, VPC, Encryption, Compliance (HIPAA, GDPR, ISO 27001)

Monitoring: Prometheus, Grafana, CloudWatch

Collaboration: Jira, Agile Frameworks
